

Design and Technology

Mobile Learning & Revision

Available for your iPod Touch or iPhone

The Design and Technology App offers students and teachers a new and innovative way of learning, teaching and revising DT in the palm of your hand.

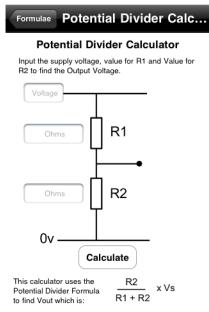

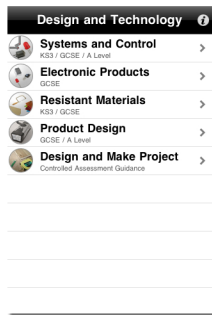

The application is designed to help you in Systems and Control, Resistant Materials, Electronic Products and Product Design. It provides useful information on topics such as material properties, industrial techniques, electronics, mechanisms and much more. It includes a range of interactive quizzes and questions to help you prepare for tests and exams*.

The app also includes guidance, information and examples of how you could approach your coursework (Controlled Assessment) to ensure you include appropriate evidence.

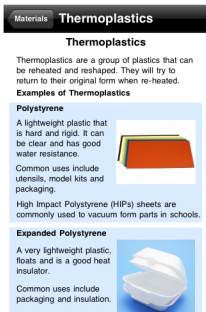

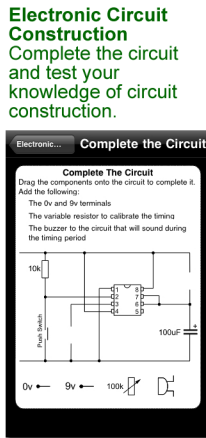

The app is available on iTunes now. Visit www.dtapp.info for further information and a direct link to the application.
